was constitutional with respect to legal debts and does not, as the paper has been, by the terms of the act, extend to a court which could render a decision which would not be a question whether a necessity for a paper tender exists, and of the time when such necessity ceases to exist."

The respect in which Pinchback, defeated applicant for a place in the United States senate, as a bloody-shirt Morton Louisiana Radical, has all the time been held by the Republican senators could not be better exemplified than it was yesterday by Senator Ferry, president of the senate pro tem., who, as the telegraph informs us, "caused all the 'door-keepers' to be specially notified that Pinchback is no longer entitled 'to the privileges of the floor.' " Fancy the feelings of Bruce, of Mississippi, who so exulted in Grant and his cabinet a few weeks ago, when he heard this order. The almost indecent haste of it, as Bruce and Morton would say, is enough to collapse the Radicalism of the dust and fix their troubled souls in everlasting doubt of those around them. Pinchback thus kicked out of the house of his friends, and loser of thirty thousand dollars of back salary through their treachery, can afford to return to Louisiana and, as he once promised, "raise hell" among the niggers.

There is some talk in Washington of disciplining Ben Hill in the Democratic caucus to prevent him from furnishing any more campaign documents for the Chicago Times as not a popular man, being aristocratic and exclusive, and by many thought to be a man of culture, irreproachable character, and honest by instinct. He has always been a strong partisan, and supported the truly loyal and regular ticket, except when he ran against Butler as the independent candidate in the Essex district some years ago, and was badly beaten. In the last campaign he spoke for Rice and Grant, but for which fact he would not probably have been nominated. Mr. Dana is an extreme high churchman, touched on many points with Anglo-phobia, and doubtless would make an acceptable minister to the English, though the Americans will not admit his extreme reserve on the whole. His appointment has brought heart-burnings to the Morton-Butler wing of the Republican party, for he has always opposed Butlerism, and contested his district in 1870. He lives in Butler's district, and is noted as a scholar of the Moulton school. He is an intimate friend of Sumner, and high in Boston's Brahmin ranks.

If the enemies of the south and the Democratic party, who take especial delight in persecuting Mr. Ben Hill, of Georgia, would surrender themselves to the spirit of fair play, and publish all that he says on the side of union and peace, the public would form a better judgment than it can otherwise, of one of the ablest and most intelligent of our public men. A case in point is furnished by what he said recently in a letter to Mrs. H. S. Kimball, acknowledging the receipt of a southern flag, captured at Millersville by the Union soldiers under Sherman. He said: "I am truly glad to have my mission in public life to do as far as I may be able in restoring public peace, and in promoting the union of the South. The South cannot afford to yield their manhood, for that would prove themselves the north unworthy. The people of the north cannot afford to yield their manhood, for that would be to confess themselves unworthy. Let the people of each section admit the great truth that we differed honestly; that we fought bravely, and that our differences are settled, in good faith, on the basis of the constitution as it is." There is not a word of this that any good citizen cannot subscribe to.

THE POSSESSION of a national currency has proved an advantage to the country. A citizen can travel, as he ought, from State to State, and everywhere the money he left home with is of the same value. Whatever difference there may be as to the quantity of national currency that ought to be issued, common sense men, unbiassed by mere notions and speculations, will wish that a genuine national currency should be retained. In the struggle of opinions upon the subject of issuing a larger or smaller amount of this currency, some zealots at Washington propose to throw embarrasments in the way of retaining the national currency, that would, if carried out, add to the causes of commercial distress which are now afflicting the country, new and still more serious obstructions to the public welfare. The supreme court of the United States has decided that the issue of legal-tender notes, by congress, was authorized by the war power with which it is invested. The war being over, the troublesome partisans in question talk of contesting the validity of all legal-tenders issued since the return of peace. It is proposed to effect this by a refusal of citizens to receive legal-tender notes in payment of debts. It is claimed that when a legal-tender note is returned to the treasury in payment of taxes, it cannot legally be refused. Should the court decide that this objection is sound, when greenbacks were paid in for national taxes, there would be no authority that could legally refuse them, or to issue new notes in their stead. This would bring about a contradiction of the currency, under circumstances, and with a rapidity that would prove calamitous in its consequences to the nation, and to the interests of every family and every individual in the country. Such a result the keenest partisan could not desire. Only those who are enemies to the United States could wish to see such a face befall its people. But this would not be all—if the government has no power to resume greenbacks, such as have been so circulated, would not be lawful money, and could not be legal tenders. This would make nearly all the greenbacks now out valueless as currency, and creditors could refuse to receive them. This would bring us to specie payments, with a catastrophe so violent that all credit would be shaken, and a national panic would sweep the whole land in disaster. The immensity of the shock is what will preserve us from it. As a contemporary has observed upon this serious subject: "The supreme court is constituted precisely as it was when it reversed the decision that the legal-tender acts were unconstitutional in their application to debts contracted prior to their passage, and decided that they

LATE TELEGRAPHIC NEWS.

Four persons were injured by a railway accident near Madison, Indiana, Wednesday.

The female did not concur with the action of the house providing for female suffrage.

In New York, Wednesday, a verdict was given in the case of the People v. M. Tweed, for plaintiff, of \$53,717.

The entire establishment and good will of the Atlanta Herald was purchased at \$100,000, Tuesday, by the Atlanta Constitution.

Charles Brent, the Louisville tobacco bank forger, is safe in the clutches of the law in London. He was traveling under the alias of Clarence Alvers.

The Detroit (Mich.) Evening News was damaged to the amount of four thousand five hundred dollars, in a suit for damages, in favor of Judge C. J. Bailey, Wednesday.

The French cabinet was organized Wednesday, and after urging the heartiest support of President MacMahon, proceeded with the work of restoring order and quiet in France.

The female institute at New Albany, Indiana, was damaged about ten thousand dollars worth by fire Wednesday. The People's insurance company, of this city, is interested in the furniture of the institute.

The committee of Democratic-Conservative members of the house of representatives of Louisiana have issued an address to the people of that State in relation to Governor Kellogg and the latter for receiving and using the same. Neither party have been found as yet, and it is supposed that both have left the city.

Another County Fund Embosser, Toledo, Ohio, March 9.—Andrew Stephens, formerly county treasurer, and William Kraus, senior proprietor of the late City bank, have been indicted by the grand jury of the county for embezzling the county funds and the latter for receiving and using the same. Neither party have been found as yet, and it is supposed that both have left the city.

Another County Fund Embosser, Toledo, Ohio, March 9.—Andrew Stephens, formerly county treasurer, and William Kraus, senior proprietor of the late City bank, have been indicted by the grand jury of the county for embezzling the county funds and the latter for receiving and using the same. Neither party have been found as yet, and it is supposed that both have left the city.

Neither party have been found as yet, and it is supposed that both have left the city.

NEW PUBLICATIONS.

ROWELL'S AMERICAN NEWS-REPORTER AND PRINTER'S GAZETTE continues to be as useful as from the first it promised, and is still most welcome in the APPEAL office.

THE LUMBERMAN'S GAZETTE is the title of a handsome weekly publication, at Bay City, Michigan, now in its seventh volume, a number of which reached us yesterday. We recommend it to lumbermen, builders and all in any way concerned with the "lumber trade."

THE MUSIC TRADE REVIEW continues to fulfill all the promise it held out in the first number, and though sometimes very harsh, almost uncouth in the language it employs in criticism upon executives, is an invaluable aid to all in the music business. Its technical reviews of sheet music cannot fail to tell in time in a department at present filled with chaos.

WE HAVE received from the publishers, 63 Victoria street, London, the February number of *The British Mercantile Gazette*, a handsome quarto, containing over thirty pages of valuable information respecting manufacturing and commercial interests. Its editorial summary is especially attractive and instructive. Our British contemporary asks the APPEAL to exchange with it, and requests us to express our pleasure in its carefully compiled trade reports cannot fail to make it a valuable addition to our exchange list. Agent Brothers are the publishers.

THE COMMERCIAL AGENT system of the United States and Canada, exposed, by Thomas F. Meagher, is a handsome quarto, containing over thirty pages of valuable information respecting manufacturing and commercial interests. Its editorial summary is especially attractive and instructive. Our British contemporary asks the APPEAL to exchange with it, and requests us to express our pleasure in its carefully compiled trade reports cannot fail to make it a valuable addition to our exchange list. Agent Brothers are the publishers.

THE second number of the *Southern Historical Society Papers*, now before us, contains "A Vindication of Virginia as the Birthplace of the American Revolution," by General E. A. Alexander, chief of artillery, Longstreet's corps; "Camp Fire of the Richmond Volunteers," by Private Carlton McCarthy, of the Richmond howitzers; "Letter from General Joe E. Johnston," "Corrections by Commodore Catesby A. R. Jones," "Narrative of the Indians," by J. L. Brent; "Tribute to J. E. B. Stuart," by Fitz Lee, delivered at Richmond, October 1875; "Seacoast Defenses of South Carolina and Georgia," by General A. L. Long, chief of artillery. The next, or March number, will be devoted to a vindication of the Confederacy in regard to the treatment of prisoners of war.

WE RECEIVED yesterday a circular from Dunn, Barlow & Co., commercial agents in reference to what purports to be an expose of their affairs by one Thomas F. Meagher, a notice of which will be found in this column. Of course, Dunn, Barlow & Co. deny the impeachment of Meagher, of whom they say: "Thomas Francis Meagher, alias Charles F. Meagher, is a real name implies, the son of an Irish pariah, who resided in Montreal. Our first knowledge of him was that he was employed as a messenger boy in the Montreal office in 1867; but, writing a good hand, he was promoted to a copyist's desk, and eventually to the charge of the cash. In 1868 he came to New York and was employed as a copyist and reader off and on for several years. He was dismissed from the New York office, about a year ago, for dishonesty, and for attempting to corrupt the fidelity of some of his fellow-workers." For further particulars, see Dunn, Barlow & Co.'s agents in Memphis or elsewhere.

THE initial number of *The Home Scientist*, a monthly journal of knowledge for the people, published at Cincinnati, Ohio, gives fair promise of success. Its purpose and scope are clearly defined in the introductory notice to a public want, which so far as we know have not been met; to occupy a field as yet unoccupied; to bring the people in cheap form, and as far as may be in language unnumbered with technical terms, or words or phrases understood only by scholars, such scientific facts and useful knowledge as shall be attractive, instructive, and elevating; that the farmer, the mechanic, the workman in our numerous manufactures, journeymen, apprentices and day-laborers, in their hours of relaxation, may at a trifling cost have at hand something from which they may derive such useful and permanent information as shall invigorate the mind and strengthen the hand. The editor, J. Edgar Brown, and John A. Clark, is publisher, Wadsworth, Medina county, Ohio, being the address.

WE HAVE received from the author, one of our best local physicians, a copy of his pamphlet entitled, "A Review of Professor T. G. Bailey's Remedy on Chronic Dysentery," by J. B. Mallory, M. D., Memphis, Tenn. The concluding paragraph of the pamphlet, in which the name of another equally reputable Memphis physician is mentioned, will indicate the scope and interest of the work. The author, as a writer of distinguished ability, has contributed largely to the advancement of our knowledge of female diseases and their treatment, and in reviewing his essay, a feeling of reluctance as well as diffidence is experienced in giving expression to the high opinion that it has created. A greater degree of surprise would not have been awakened if he had published to the world that he had been the cause of the intensest fever of five years standing with the people of the principle of Peruvian bark, familiar to us all. With equal correctness and with equal success, he might have written of the value of another equally reputable Memphis physician is mentioned, will indicate the scope and interest of the work. The author, as a writer of distinguished ability, has contributed largely to the advancement of our knowledge of female diseases and their treatment, and in reviewing his essay, a feeling of reluctance as well as diffidence is experienced in giving expression to the high opinion that it has created.
